## DETAILED ACTION

### *Election/Restrictions*

Claims 1-20 and 40-58 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Group I and III, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9/25/06.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21-24 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 19619226 (herein after DE '226).

DE' 226 discloses an ozone gas sensing element that comprises a dye with conjugate double bonds in a polymer layer containing polymers. The ozone element reacts with the ozone gas in the surrounding air and changes in a light absorption characteristic in the visible region (col. 2-4, fig. 1). Indigo is discussed in the translated abstract text.

Claims 21, 22 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 62-291564 (herein after JP '564).

JP '564 discloses an ozone detection element that comprises a porous material 3 that contains a triphenylmethane leuco dye therein (impregnated) and an acid stabilizer. The ozone detection element reacts with ozone in the surrounding air to develop a colorimetric reaction in the visible region.

***Allowable Subject Matter***

Claims 25-27, 29, 31-39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
